Limitations and known issues

Open JDK must be installed

Known issues (priority critical or high):

Jira Reference	Description	Priority	Consequence
WPDM-1238	Application at start up, stuck in "connecting state"	High	WinPDM at start up, stuck in "connecting state" and no portables are shown. This has been observed 1/10. Restarting WinPDM resolves issue
WPDM-1240	During swdl an a71 or a72 got "bricked", stuck in software download pending.	High	This happens around 1/200 swdl. Workaround to remove battery and performe forced swdl.

Supported Windows version

Windows 11 (64-bit) – recommended and tested

For tested USB-Hubs see appendix

Known bugs

In rare occasions, the device is not shown in the device list in WinPDM, if this happens, restart WinPDM to solve the issue.

Sometimes the handset does not appear online after the upgrade or downgrade, and the previous software version is present in the "Software version" section in WinPDM. The problem appears randomly. If this happens, remove and insert the handset into the charger.

Compatibility Information

Downgrade Not recommended. Max downgrade to 4.1.13
